### Meet the Speakers

#### BRIANNA BUSEMAN

Brianna Buseman grew up on a farm near Canistota, SD. Her family raises Angus cattle and sells bulls by private treaty throughout the Midwest. Brianna graduated from South Dakota State University with a B.S. in Animal Science and Agricultural Business. Following graduation, she moved to Moscow, ID to pursue her M.S. in Animal Science with a Meat Science focus and graduated in May of 2020. Currently, she works as the Youth Meat Animal Extension Assistant Professor at the University of Nebraska-Lincoln. In this position, she develops youth programming to teach students about meat production and seeks to introduce them to potential careers in the industry. Additionally, she teaches the meat evaluation, grading and judging class at UNL and coaches the meat judging team.

#### DR. GEORGE PERRY

Dr. Perry was raised in south-central Texas on a small cattle operation. He received his bachelor's degree in animal science from Texas A&M University. He obtained a master's degree and a doctoral degree in reproductive physiology from the University of Missouri, with a large portion of his doctoral research conducted at the USDA research station in Miles City, Montana. Dr. Perry was a faculty member and Beef Reproduction extension specialist in the animal science department at South Dakota State University for 17 years. He now serves as an Associate Professor with Texas AgriLife at the Overton Research station. His research efforts are in the area of factors that influence reproductive efficiency, pregnancy success, and embryo mortality. Some of his current research has focused on understanding why variations occur between herds, the impact of vaccination of reproductive success, and factors impacting sperm longevity. He has been invited to speak at numerous national and international conferences on reproductive efficiency in beef cattle, and his research program has published numerous manuscripts on reproductive efficiency.
