****Phenotype/Genotype:** The objective behind the Phenotype and Genotype Show (PGS) is to create another avenue for juniors to show their heifers in an additional competition while providing an educational opportunity to learn about the value of Expected Progeny Differences (EPDs) as a part of the process in selecting seedstock. To enter the PGS all animals must have been genomic tested prior to entry deadline. After check-in, the PGS judge will receive judge's cards split in classes that include entry number, birthdate, and EPDs (CED, BW, WW, YW, Milk, Marb, REA, \$M, \$W, \$B, \$C) along with a percentile chart. For the PGS, the same judge will evaluate the EPDs and the phenotype classes. He/she will place the class based on his/her preferences. Results will be turned into the Association staff to compile prior to the show. The show will be run similar to other NJAA sponsored shows where the judge will evaluate the class in the same manner as a regular phenotype show. The judge will receive a judge's card with birthdates only for phenotype classes. The phenotype placings will be recorded and compiled with the genotype placings. The composite score will be made up of 50% genotype placing and 50% phenotype placings. In the event of a tie, the tie will be broke based on the phenotype placings. The judge will then receive a judge's card with the composite placing and respective EPDs to talk the class. PGS heifers may also be shown in the owned or bred and owned show.
